Australian Best Performance

Updated Information

Motion was approved at the LAA October 2013 Conference to consolidate ABP and ABPe's (also ATC and ATCe's), in order to tidy up the "records" (Best times) and create one system for documenting these. It is proposed that a formula be applied to current times, to create a standardised system, and to bring all performance times into alignment. Once the formula had been applied, the standardised hand-held time would indicate that it had been amended using the formula, and the best result (standardised hand-held time **OR** Fully Automated Time) would then become the ABP for that event.

The correct formula for standardising the hand held time is as follows:

For distances under 400m:

Hand held time + 0.24 seconds

For distances of 400m or 4x100m relay:

Hand held time + 0.14 seconds

For distances greater than 400m:

No change

A standardised time should be indicated with {S} or similar

Reason: Noted that there are known differences in times recorded by hand held timers, including electronic gates (ABP), and times recorded using automated timing (Photo Finish) (ABPe). In many cases, the ABPe is slower than the ABP (average of 0.24 seconds for distances up to 400m, average of 0.14 seconds for distances of 400m or 4x100m relay, no difference for distances greater than 400m). It was also noted that hand held times were traditionally rounded up to the nearest 0.1 of a second. Proposal that only one time be recorded for each track event, rather than current system of recording one Hand Held and one Electronic (FAT).

When publishing ABP's from now on, an explanation will need to be provided as to how the standardisation process works. Old times will be archived, but not published.

Going forward, ABP claims will need to be in the standardised format. The original time and the standardised time should be provided, to allow LAA to verify the calculations and the record claim. LAA to amend ABP claim form to allow for inclusion of both of these times.

The same process will apply to ATC's, which will now become the Meet Record.
